

# Tiny Cakes Bakery - One Page Site

Assignment: Design and code a one-page client website. Client: Tiny Cakes Bakery

Goals: Tiny Cakes wants a well-designed, easy-to-read, professional website to sell their cupcakes. They are excited to share their tiny cakes with the world.

Design: Tiny Cakes has provided a logo as a transparent PNG. You can tweak the logo as needed, but use the Style Tile as a reference for the visual design and aesthetic of the website. You should use the color scheme and fonts indicated by the Designer in the Style Tile. Tiny Cakes also likes things that are easy to read. They want to appear welcoming, warm, and playful. They like softer colors but care more about the site colors matching with the logo and imagery more than sticking with the exact colors provided.

Requirements: A single page website with sections About / History / Store / Contact. The navigation should be fixed, as in the Lion Consulting website. Each section should be included in the navigation menu and linked as anchor/div links. Use the Lion Consulting website as a guide, with a main centered content container and a background. The background should utilize a repeated image body background or textured background. The website should also be fully responsive and you should utilize Bootstrap's Grid System to create your page. Plan ahead to make sure your Grid will work for your entire website.

**ABOUT & HISTORY:** Use lorem ipsum placeholder text for About and History sections (*Bonus: if you have time, help the client write his copy!*)

**STORE:** The Store should be an image gallery or portfolio that showcases 8 different cupcakes that are available. Placeholder images are okay.

*(Bonus: Create custom buttons for each product that indicate "Buy Now" or "Add to Cart." The buttons should have hover states. The links themselves do not need to work. Utilize Font Awesome for icons for your buttons.)*

**FOOTER:** There should be a footer section with contact info and copyright. The contact section should include a mailto link to [tiny@tinycakesbakery.com](mailto:tiny@tinycakesbakery.com). The copyright section should include a copyright symbol and copyright information.

**IMAGES:** Use other images as needed. Some images have been provided by the client. Edit the images using Pixelmator or find other relevant images using Google image search.

More Bonus Tasks: (Optional/Extra Challenges!)

*Include an unordered list of links to articles and media about Tiny Cakes Bakery. Placeholder text is okay.*

*Make sure all images include tool tips (title attribute).*

*Add social media icons/buttons in the footer OR in the navigation. (ie. Facebook, Twitter, LinkedIn, Instagram)*
